

# HEALTH NEEDS ASSESSMENTS

*We fill critical gaps... empowering organizations to lead with greater equity, efficiency, and effectiveness.*

## Expert-Led Assessments, Reduced Staff Burden

Health and community needs assessments are often legally required, but conducted only every few years... making them high-stakes, time-intensive efforts for already stretched teams. We lead comprehensive needs assessment efforts that support compliance, credibility, and informed decision-making. Our work helps organizations meet regulatory requirements while gaining meaningful insight to guide priorities, investments, and action.

### How We Can Support

Needs assessments help organizations understand priorities, identify gaps, and guide action. We provide trusted, third-party support for:

- Data research & analysis
- Engagement, surveys & focus groups
- Facilitation & priority-setting
- Implementation planning & support
- End-to-end project management

### Why ChangeBridge

Our team brings decades of combined experience conducting health and community needs assessments across Illinois, with work recognized at both state and national levels. We combine data analysis, community engagement, and facilitation expertise to deliver assessments that are rigorous, inclusive, and actionable, whether supporting a single phase or leading the project and implementation from start to finish.
